* ICD-10 -CM codes are to be used on or after 10/1/2015.

How to Improve HEDIS® Scores

- Use appropriate billing codes as described above.
- Educate patients on the importance of having at least one ambulatory or preventive care visit during each calendar year.
- Contact patients on the opportunity list who have not had a preventive or ambulatory health visit.
- Make reminder calls to patients who have appointments to decrease no-show rates.
