How to Improve HEDIS® Scores

- When prescribing a new medication to your patient, be sure to schedule a follow-up visit within 30 days to assess how the medication is working. Schedule this visit while your patient is still in the office.
- Schedule two more visits in the 9 months after the first 30 days, to continue to monitor your patient's progress.
- NEVER continue these controlled substances without at least 2 visits per year to evaluate the child's progress. If nothing else, you need to monitor the child's growth to make sure they are on the correct dosage.
