

## HEDIS® Provider Guide:

### Measure Description

Prenatal care visit in the first trimester or within 42 days of enrollment, where the practitioner type is an OB/GYN or other prenatal care practitioner or PCP\*, with one of these:

- Basic physical obstetrical exam that includes auscultation for fetal health tone, **or** pelvic exam with obstetric observations, **or** measurement of fundus height (a standardized prenatal flow sheet may be used).
- Obstetric panel
- Ultrasound of the pregnant uterus
- Pregnancy-related diagnosis code
- TORCH antibody panel (Toxoplasma, Rubella, Cytomegalovirus and Herpes simplex testing)
- Rubella antibody test/titer with a Rh incompatibility (ABO/RH) blood typing (e.g., a prenatal visit with rubella and ABO, a prenatal visit with rubella and Rh, or a prenatal visit with rubella and ABO/Rh).
- Documented LMP, EDD or gestational age with either a completed obstetric history or prenatal risk assessment and counseling/education.

(\* ) For visits to a PCP, a diagnosis of pregnancy must be present along with any of the above.

### Using Correct Billing Codes

Please note that global billing or bundled codes do not provide specific date information to count towards this measure.

\* ICD-10 -CM codes are to be used on or after 10/1/2015.

### How to Improve HEDIS® Scores

- Schedule prenatal care visits starting in the first trimester or within 42 days of enrollment.
- Ask front office staff to prioritize new pregnant patients and ensure prompt appointments for any patient calling for a pregnancy visit to make sure the appointment is within the first trimester or within 42 days of enrollment.
- Have a direct referral process to OB/GYN practitioners in place.
- Use the prenatal calendar tools to ensure the visit is within the correct time frame.
