Using Correct Billing Codes

Codes to Identify Adolescent Immunizations

Description	CPT Codes
Meningococcal	90734
Tdap	90715
Human Papillomavirus (HPV)	90649, 90650, 90651

How to Improve HEDIS® Scores

- Use the California State Immunization Registry (CAIR) to register immunizations:
<https://cair.cdph.ca.gov>
- Review missing vaccines with parents.
- Recommend immunizations to parents. Parents are more likely to agree with vaccinations when supported by the provider. Address misconceptions about vaccinations.
- Train office staff to prep the chart in advance of the visit and identify overdue immunizations.
- Make every office visit count. Take advantage of sick visits for catching up on needed vaccines.
- Have a system for patient reminders.
- Some vaccines may have been given before the patients were CHOC Health Alliance members. Transcribe these vaccinations into CAIR even if your office did not provide the vaccine.
